## Equity + Success of Space

Kristen Dong  
M.S. Design Computing Candidate

# Exclusionary Design Tactics

- Law has addressed explicit restrictive ordinances
  - ex. Racial segregation by law
- Law has NOT addressed less obvious exclusionary design tactics.<sup>1</sup>

AIA FEATURE

## A Seat at the Table

To design affordable housing in African American neighborhoods, architects navigate class, race, identity, and community in a privatized system. But can things get better?

## The Guardian

Why aren't we designing cities that work for women, not just men?

Bad town planning can impact women's safety, movement and even income. Research led by the people most affected should inform a new approach

## America's Unfair Rules of the Road

How our transportation system discriminates against the most vulnerable.

By CORINNE RAMEY

FEB 27, 2015 • 3:33 AM

“The exclusionary built environment- the architecture of a place- functions as a form of **REGULATION**; it constrains the behavior of those who interact with it, often without even realizing it.” <sup>1</sup>

1. Schindler, Sarah. *Architectural Exclusion: Discrimination and Segregation Through Physical Design of the Built Environment*. The Yale Law Journal, 2015

What are some ways the built environment regulates?

Are these regulations equitable? Are they needed?

# Definition: Equity

- Equity is both a decision-making factor and the result of the decisions made.
- Designing with equity in mind means that inclusive design is considered from the beginning to the end of the design process.
- Assessing equity in a built environment means that it is accessible, attractive, and interactive to as large a subset of people as possible.

Inclusivity of users is directly related to the success of a space because the **users themselves determine success.**

# What makes a successful space?

- All aspects of space are user-determined
- Users determine success metrics of space
- Self-perpetuating spaces
  - Popular spaces attract people
  - Presence of people attracts more people

## Equity Value Cases:

A decision-making factor and the result of decisions made

Ownership and  
Belonging

Attraction and  
Interaction

- Inclusion of citizens during the design process **acknowledges the citizen's point of view and values it alongside that of the professional.**<sup>2</sup>
- This gives the community agency and increases their feelings of **ownership, belonging, and satisfaction** in a space.<sup>3</sup>
- Including marginalized groups previously excluded from design processes can help build **diverse, resilient, and engaged communities.**<sup>4, 5</sup>

# Value Case: Ownership and Belonging

## Local engagement:

- City of Seattle Community Outreach Guidelines<sup>6</sup>
  - Requires applicants to use a minimum of one “high-impact” method or two multi-pronged methods to engage community
    - High impact: Door to door flyers, direct mailings, posters on local businesses
    - Multi-pronged: Project webpage, email to distribution lists
- Special considerations for “Equity Areas” with limited English proficiency, people of color, and/or low income households

Source: City of Seattle

6. City of Seattle, *Early Community Outreach for Design Review*, SDCI Director’s Rule 4-2018 / DON Director’s Rule 1-2018

- Successful spaces provide environments that are **open, accessible, and responsive** that facilitate different uses and satisfy user requirements (comfort, discovery, socialization, etc.)<sup>3</sup>
- People from marginalized communities will gather in spaces they feel are **safe and accepting of them.**<sup>7</sup>
- Commodification of diversity and urban cultural diversity are becoming more widely known as an incentive to business investors.\*<sup>8</sup>

GARLAND POTTS / THE SEATTLE TIMES

## Liberty Bank Building Memorandum of Understanding's 8 Elements

1. Secure long-term African-American ownership of the building
2. Provide affordable commercial space
3. Develop and support Black-owned businesses
4. Design a building that connects with the history of the community
5. Prioritize local and minority hiring
6. Reaffirm the Central District as a hub of the pan-African community
7. Explore further policy changes
8. Diversify Capitol Hill Housing

How might we design more equitable spaces in the future?

Strategies for convincing stakeholders that this equitable design is valuable?

- Architecture is a form of regulation, controlling the behavior of those who interact with it.
- Consider equity and user experience from the beginning of the design process.
- Inclusive design will result in a more successful space because success of space is determined by the user.
- Design for:
  - Ownership and belonging
    - Give users agency over their own environment
  - Attraction and interaction
    - Inclusive design → More users → A more popular, successful space
